

AY2026 1st Research Ethics Education Seminar

Laboratory Management Seminar for Early-Career Researchers and Independent PIs

— Key Principles of Fair Laboratory Management Learned from Role Models —

Are you struggling with setting up or managing your laboratory?

Healthy laboratory management is an essential foundation for research integrity. This seminar focuses on the initial challenges that early-career researchers and newly independent PIs frequently encounter. Experienced senior PIs will share practical insights and specific case studies, and through discussion among participants, attendees will learn key strategies for smooth and fair laboratory management.

Date & Time: Tuesday, October 6, 2026, 15:00 – 16:30

Format: Online (Zoom) *URL sent upon registration *Note: This seminar will be conducted in Japanese*

Target Audience: Early-career researchers, newly appointed PIs, and faculty/staff interested in laboratory management (Participation is free)

Main Topics

- Real-life experiences in setting up and managing a laboratory
- Implementation of various safety training (compliance regarding experimental safety, equipment management, IT usage, etc.)
- Case studies on accepting international students and diversity considerations
- Q&A with senior PIs & exchange of opinions and discussion among participants

Guest Speakers (Role Model PIs)

- **Prof. Yu Kumagai** (Institute for Materials Research)
- **Prof. Yuta Saito** (Green Cross Tech Research Center / Graduate School of Engineering)
- **Assoc. Prof. Anna Suzuki** (Institute of Fluid Science)

[Registration]

Deadline: Wednesday, September 30, 2026
