

Tohoku University “Plastics Smart” Campaign

In recent years, plastic waste has become a major source of global marine pollution. To improve the current situation, we all need to reduce our use of non-recyclable plastic packaging, containers and products. Tohoku University will promote understanding among staff and students regarding the need to tackle this pressing issue, and promote research and technological advancements on plastic waste reduction.

Encouragement to bring mugs and shopping bags from home

Refraining from serving bottled drinks at meetings

Thorough separation of plastic waste from other waste

Promotion of research on “Plastics Smart” is being led by Tohoku University
