

What's the Safety Confirmation System?

A system that allows you to easily report your safety status to the university!

This system will send safety confirmation and emergency notifications to the addresses registered in the Student Affairs Information System or Integrated Electronic Authentication System so that you can receive them on your mobile phone or PC.

If you receive a notification by e-mail, access the system via the URL provided in the message.

Simply select your responses to report your safety status.

For instructions on registering/changing your e-mail address, and information about the system, please access the below website:

<http://www.bureau.tohoku.ac.jp/somu/ampi/index.htm>

Dedicated mobile app

Accessed via e-mailed URL

Warning!

Please make sure you've registered an e-mail address that you check frequently.
