1.Login to New TUMail (Gmail)
1.2 Set up 2-Step Verification

In this section, we will explain how to change the verification method, which is a more secure setting for New TUMail (Gmail).
The method includes registering SMS and telephone numbers.
Two-step verification can be highly secure, as it checks the verification code each time you log in.

1.2 Set up 2-Step Verification

Two-step verification can be highly secure so that the verification code is verified each time you log in. There are the following authentication methods, please check the following.
https://www.google.com/landing/2step/?hl=JA#tab=why-you-need-it

Get codes via text message

Google can send verification codes to your cell phone via text message. Your carrier's standard messaging rates may apply.

Receive the code on a mobile phone

Want a phone call instead?

Google can call your cell or landline phone with your verification code.

Receive code on a landline at work

No connection, no problem

The Google Authenticator app for Android, iPhone, or BlackBerry can generate verification codes. It even works when your device has no phone or

(Use offline for business trips, etc).
Make a confirmation code with the authentication system app.

Backup phone numbers

Add backup phone numbers so Google has another way to send you verification codes in case your main phone is unavailable.

Receive code on a landline at work

Backup codes

You can print or download one-time use backup codes for times when your phones are unavailable, such as when you travel.

(Can't use a telephone etc.) Create one-time confirmation code

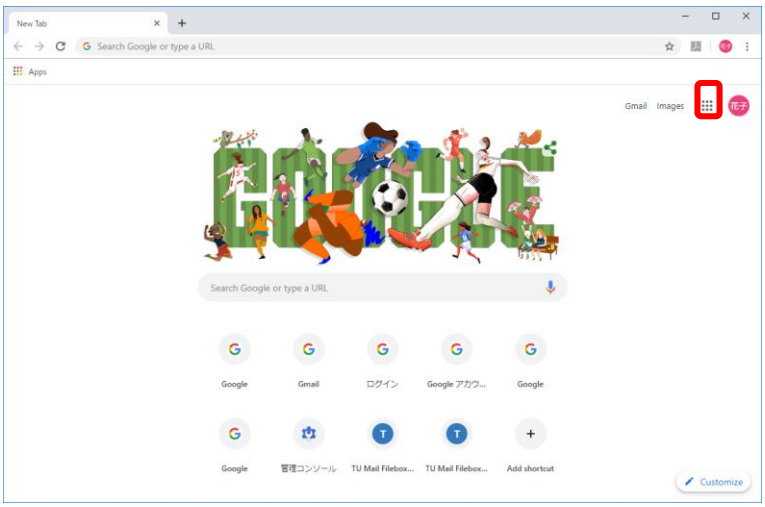

Register your computers

During sign-in, you can choose not to use 2-Step Verification again on your computer. We'll still ask for codes or Security Key on other computers.

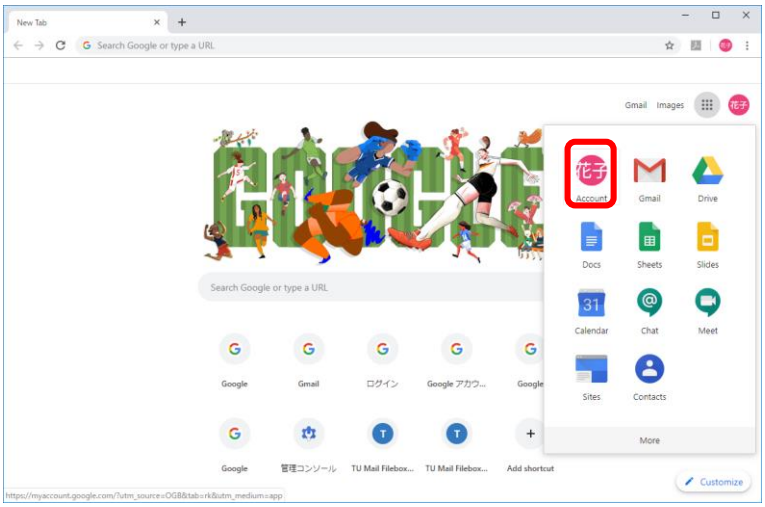

(When the worries about PC theft are low) Register your PC

The following is a description of how to receive codes on a text message.

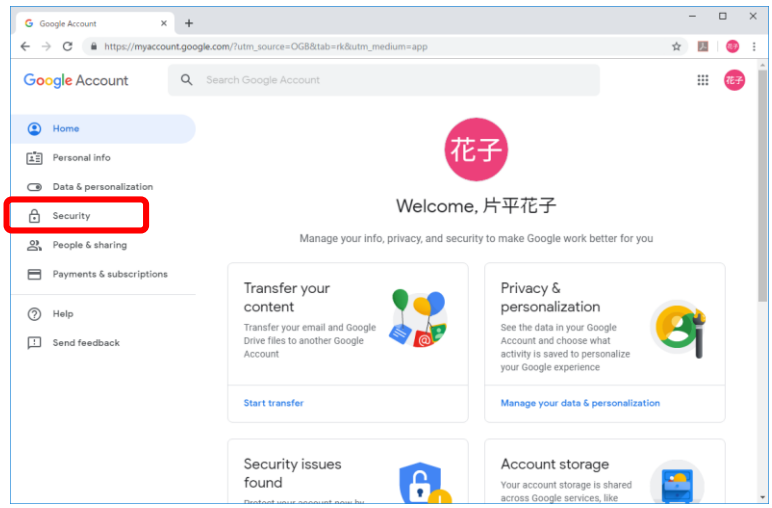

1. Log in New TUMail (Gmail), and click the Google Apps icon.

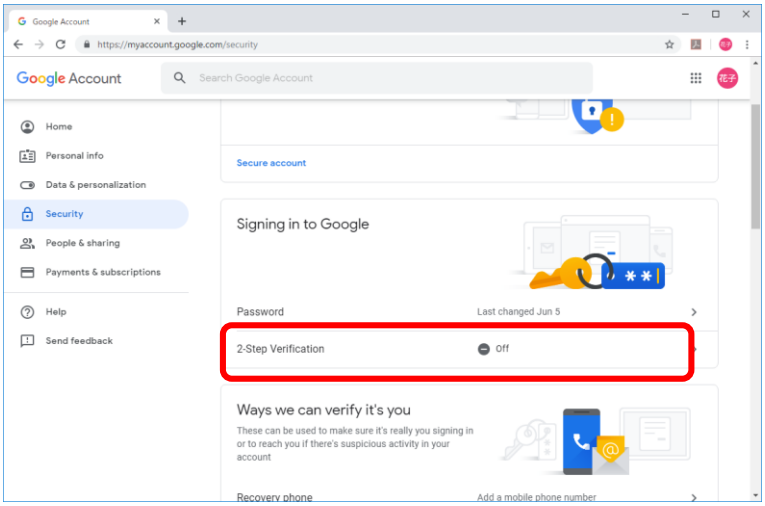

2. Click the Google Account icon.

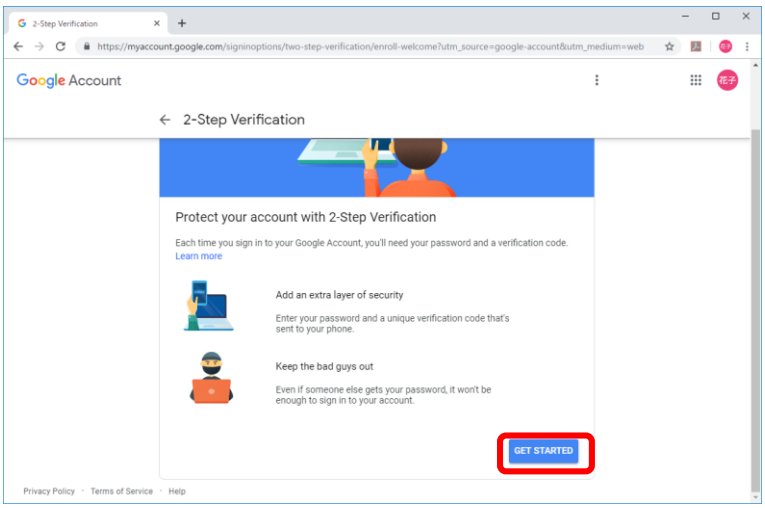

3. Click on the 「Security」 tab.

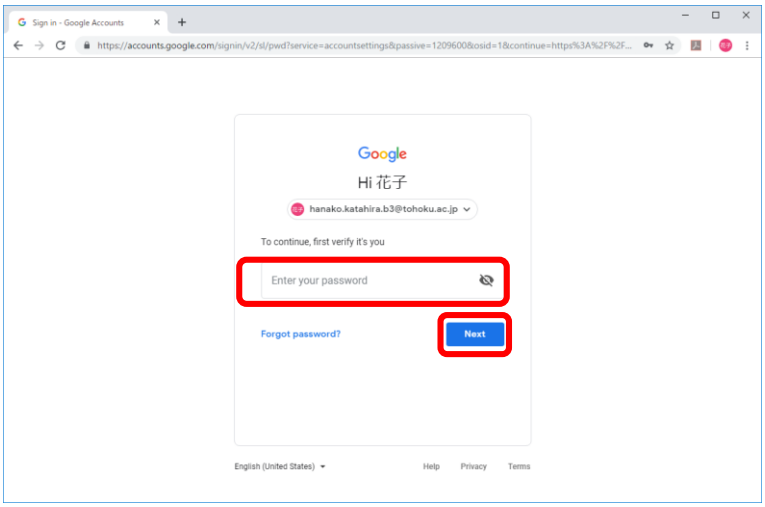

4. Click on「2-Step Verification」

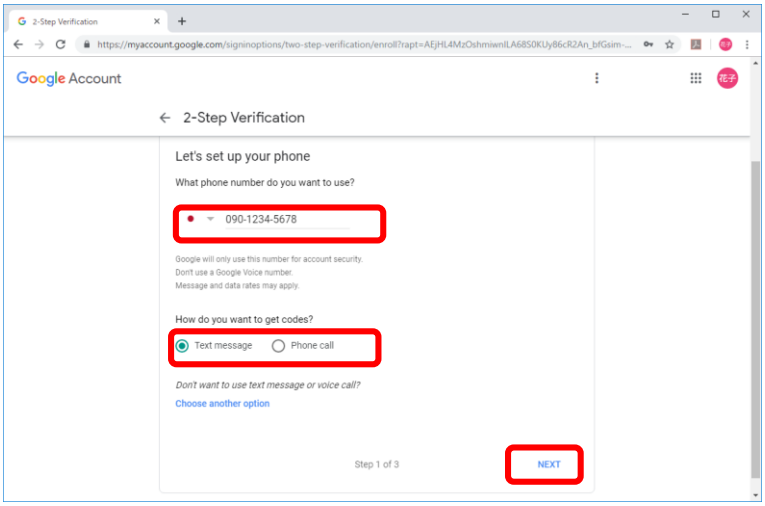

5. Click on「GET STARTED」

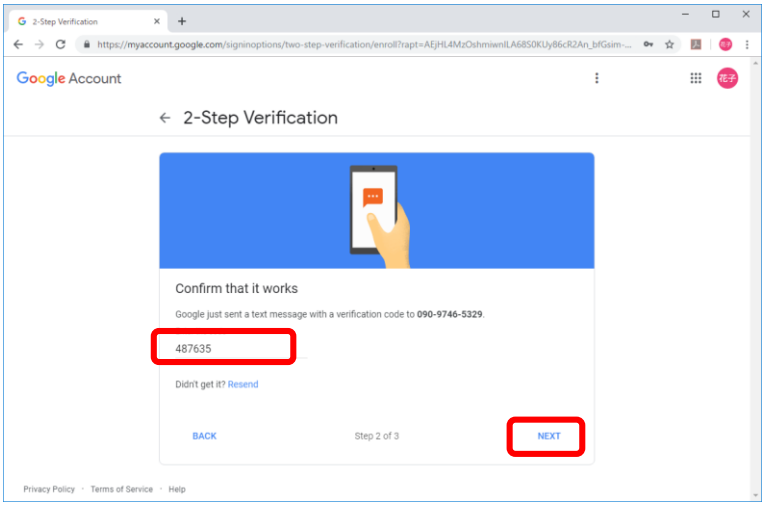

6. Enter your TUMail password and click Next.

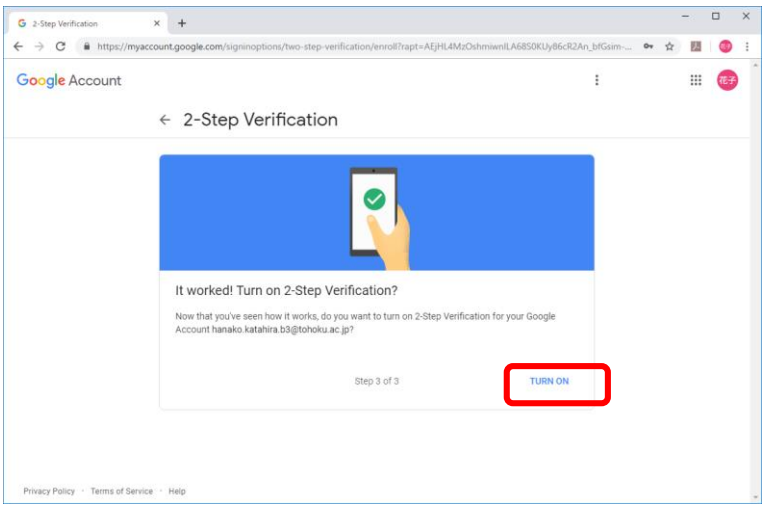

7. Enter a mobile phone number, select a code acquisition method, and click [Next].

8. The code will be sent to the mobile phone's SMS. Enter the sent code and click "Next".

9. The following confirmation screen is displayed. Click “Turn on".

10. The setting is complete if the following screen is displayed.
