# 1. Set up New TUMail(Gmail)
# 1.5 Set up a email client Thunderbird POP and Outlook etc. that does not support OAuth 2.0

This section explains initial settings when using a client incompatible with OAuth 2.0 (such as Outlook) and Thunderbird for POP.

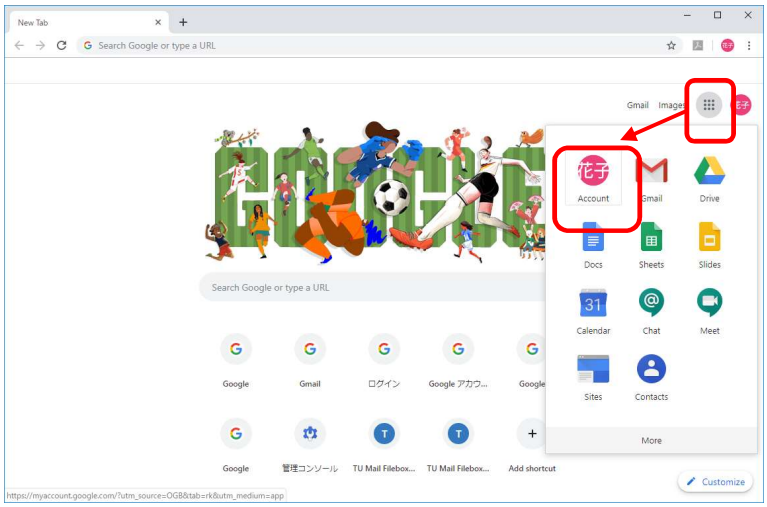

【Note】
If you use **Thunderbird for POP** reception, **the setting is necessary.**

The setting screen will not be displayed if the setting of “1.2 Set up 2-Step Verification” is set. Please set "1.6 App Password Settings" when using email client.

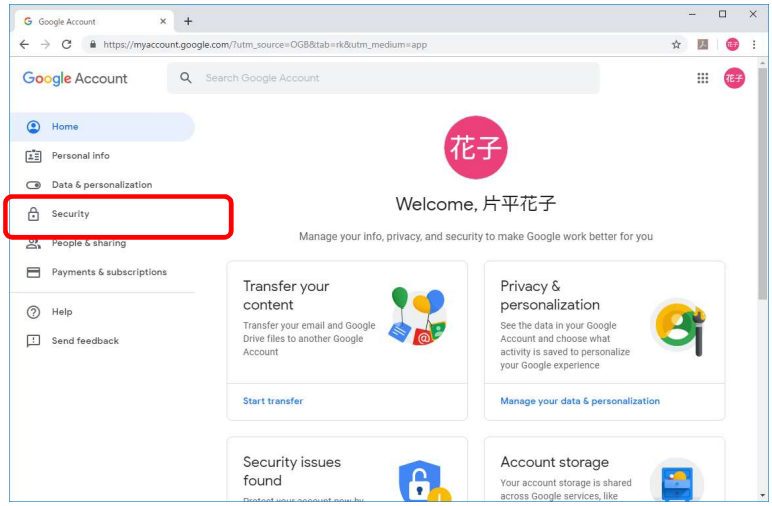

# 1.5 Set up a client(Outlook,Thunderbird etc.) that does not support OAuth 2.0
